

From: King of Waters

To: Task Force

Tsar Fish has confirmed the start of Operation End Station. We are proceeding to take over the high importance target according to the original plan. The deadline for the action is May 14, 2023.

I don't think I need to remind you what importance it has for our friends. We have to seize it LIVE and deliver it to the evacuation point. If witnesses show up you know what to do with them - deal with them (just without the mess).

I've already talked to one of my suppliers, he'll get us a hideout in Africa, where we'll wait until the case dies down a bit and the military loses the trail. I buy a lot of weapons from him, so he must do me a favor sometimes.

I'll put the rest of the materials where I usually do (as if you forgot again: <https://drive.proton.me/urls/KVHN59CB1W#pKwWdXe8ATZn>). Make sure the car is operational. I don't want to hear about a busted timing belt again.

Clean out the hideout and pack up all the equipment, burn the documents. We will not return here.

*Ad Victoriam*
